Profile

Full Stack Developer with expertise in building scalable web and mobile applications. Skilled in modern frameworks, backend development, and AI-powered solutions, with a strong focus on performance and problem-solving.

Professional Experience

01/2025 – present remote, Netherland	Full Stack Developer <i>Brain Bite</i>  At Brainbite, I worked as a Full-Stack Developer on an AI-powered e-learning platform designed for young children to make learning interactive and engaging. I developed frontend features using Nuxt.js and Vue.js, and built backend services with Supabase. In the platform’s early stages, the user base grew by 25%, while I helped improve system stability by 15% and increased user engagement by 20%. I collaborated closely with the AI team to integrate smart learning features and consistently delivered high-quality solutions on schedule.
09/2023 – 12/2023 remote, USA	Front End Developer <i>Pami Factura</i>  At Pami Factura, I primarily worked on the frontend of an invoicing platform tailored for Latin American users, serving over 10,000 active customers. My contributions improved the user interface and responsiveness, leading to a 40% faster invoice processing experience and reducing user-reported errors by 25%. This helped streamline billing operations and enhanced overall customer satisfaction..
09/2024 – 02/2025 remite, Canada	Nucleus Institue  <ul style="list-style-type: none">• Developed frontend web applications using Next.js, delivering 5+ products on schedule under tight deadlines.• Built mobile apps with React Native, enhancing user experience and app performance.• Improved app responsiveness by 30% and reduced bug reports by 25% through frontend optimization and collaboration with backend teams.• Consistently ensured timely releases and high-quality user experiences in a fast-paced environment
07/2023 – 08/2024 Addis Ababa, Ethiopia	Full Stack Developer <i>Adnana Business Group</i>  Developed government e-service platforms with Laravel (backend) and Next.js (frontend). Optimized state management with Redux Toolkit and Redux Saga. Improved accessibility for 10,000+ users, boosting efficiency by 20% and engagement by 25%. Ensured scalability for 50,000 concurrent users.

Skills

programming languages (python | javascript | typescript | php | java))
Database (my sql | postgres sql | sqlite | supabase)
frameworks and tools (React.js | Next.js | Node | Nest | ReactNative | Django | Djangoestframework(DRF) | laravel | graphql | Git | GitHub | GitLab | Docker | Postman | jest | play wright)

Education

05/2022 – 05/2026 Addis Ababa, Ethiopia	Computer Engineering <i>Addis Ababa University</i>  Specialized in Computer Engineering with a focus on software development, embedded systems, and AI. Gaining expertise in system design, algorithms, and performance optimization while applying engineering principles to real-world technology solutions.
